A New Era with Evo: Faster, Smarter Care is Here

MeMD is now Evo. With this change, there's no interruption to your service, just an enhanced, expanded care experience for your members. Discover the new features available in 2026, including more convenient Everyday & Urgent Care services and a Spanish language member experience.

What's new with Evo in 2026?

1 Faster, More Convenient Care

We've streamlined the path to care. With Evo's proprietary Quick Care option available for Everyday & Urgent Care, members can now receive a treatment plan for common conditions without ever having to meet live with a provider.

Members simply complete a brief **5-10 minute questionnaire** about their symptoms, and an Evo provider will review their responses and provide a personalized treatment plan, including prescriptions sent to a pharmacy of the member's choice when medically necessary.

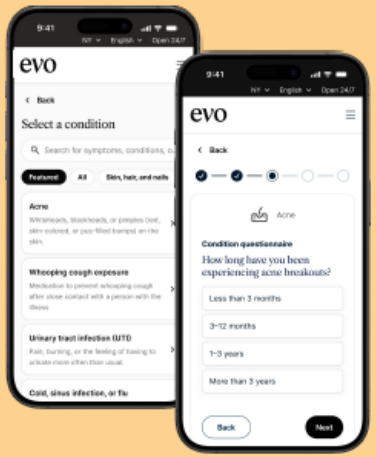

2 More Common Conditions Treated

Evo is committed to broadening the scope of virtual care. Our clinical team continually expands protocols to treat over 2,000 unique diagnoses, ranging from cold and flu to male pattern baldness and pre-diabetes screenings. Labs can be ordered when clinically appropriate.

3 Enhanced Clinical Experiences

Evo delivers clinically validated experiences that are faster and easier for members throughout their care journey. Post-visit, members can access pharmacy selection (when appropriate) and follow up with their provider for up to 24 hours. Care coordination is available 24/7.

Smarter, faster, and more supportive than ever before for your members. Evo is better for their wallets—and your bottom line.

Get a treatment plan in minutes with Quick Care.
